

Advanced Laparoscopic Cadaveric Workshop for Paediatric and General Surgeons

2-3 October 2012

RCS London

This course will provide surgeons with the opportunity to learn and practise the operative steps of a defined set of operative procedures which are relevant to Paediatric and General surgical Training. Participants will develop their skills on fresh frozen cadavers.

Course Directors

Mr Girish Jawaheer

Consultant Paediatric Surgeon

Specialty Tutor in Paediatric Surgery, Royal College of Surgeons of England

Ms Avril Chang

Consultant General Surgeon

MIS Tutor, Royal College of Surgeons of England

Learning Outcomes

- Develop awareness of common operative pitfalls
- Enhance ability to safely use common energy sources
- Develop a clear strategy of safe operative steps for a defined set of operative procedures
- Acquire practical tips and tricks from experts in the field

Who should attend?

ST7 - 8 and junior consultants in paediatric and general surgery

Course Format
