## Course description:

This course is designed for pediatric surgeons, pediatric surgical trainees as well as pediatric nurses managing children with colorectal issues. In addition to lectures and case discussions, it includes live demonstrations of the surgical repair of frequent types of anorectal defects illustrating the spectrum of anorectal malformations.

This two-day intensive teaching course will examine the management of pediatric colorectal surgical problems including:

- Live operating room demonstrations with discussion
- Methods of evaluation of surgical techniques
- Anorectal Malformations
- Cloacal Malformations
- Pre and postoperative considerations
- Hirschsprung´s disease
- Idiopathic Constipation
