

Operative Skills in Neonatal and Paediatric Surgery

This practical skills course is for all trainees who want to practice neonatal operations on animal tissue with a dedicated faculty, close tuition and feedback. The course aims to develop surgical skills focusing on the management of a number of neonatal and infant conditions.

Course content includes

- Bowel anastomosis
- Stamm Gastrotomy and Pyloromyotomy
- Neonatal Bowel Anastomosis (Atresia)
- Duodenal Atresia
- PUJ Obstruction
- Vesico- ureteric Reflux

Who should attend?

ST3-8 and SAS Grades

Why take this course?

This is a unique opportunity to practice neonatal operations on animal tissue with dedicated faculty, close tuition and feedback.

Delegate feedback

'Excellent course, very well thought out/prepared models (animal & plastic). Lovely faculty who spent quality time with every participant. Excellent feedback. Overall a fantastic course! Just a shame there aren't more courses like it for paediatric surgery!'

'The faculty were really great. The ratio of faculty to delegates and their enthusiasm meant that there was great hands on teaching, useful tips, good background and feedback.'

Dates

1 – 2 February 2017

Held at

RCS London
