PEDIATRIC SURGERY

Postgraduate
Seminars

4th PESPOS

Necrotizing enterocolitis-
A clinical and surgical update

27th - 28th November 2014

Cambridge, United Kingdom

Postgraduate Seminars in paediatric surgery is an annual meeting to discuss relevant topics in paediatric surgery and present a current clinical and surgical update. Lectures are offered for specialists and trainees at all stages that take care of surgical needs of children.

Cambridge University Hospitals 
NHS Foundation Trust

Dear Colleagues and guests,
Honoured speakers,

We are Paediatric Surgical registrars who got together to organise high quality lectures delivered on a grand scale on different topics relevant to paediatric surgery. These lectures serve to actualise paediatric surgeons, paediatricians - medical students, trainees, consultants and nursery staff.

Paediatric Surgery is a broad specialty that not only accounts for the surgical care of children but that requires a multidisciplinary approach to different ailments. We want to incorporate into this lecture series a more integrative approach and invite leaders in different aspects of paediatric surgery and related specialties to give us an actual and practical overview on the disease process, management and interaction between medical and surgical treatments.

This year's topic will be

Necrotizing enterocolitis - a current clinical and surgical update

Acute abdominal conditions in the newborn, like NEC, is a well known disease in the newborn period. The outcome is very much dependent on the severity of the disease as well as the child's prerequisite. During these two days we want to go beyond our own knowledge and discuss the problems and pitfalls within this disease from several perspectives. Amongst many specialties we've invited neonatologists, gastroenterologists, paediatric surgeons and nursery staff to widen our views.

We look forward to meeting you in Cambridge, one of the most beautiful university towns in Europe.

Yours sincerely,

PESPOS team

Topics to be covered

Thursday, 27.11.2014

14:00 Welcome

Medical management of NEC

Steve Kempley, Royal London Hospital, London, U.K.

Role of innate immunity in necrotizing enterocolitis

David Hackam, Children's Hospital of Pittsburgh, U.S.

Microbiomics and Necrotizing enterocolitis

Gustav Beltaki, Addenbrooke's Hospital, Cambridge, U.K.

How do we quantify the 'best interests' of a child with NEC?

Robert Wheeler, Southend University Hospital, Southend, U.K.

Poster walk

Dinner at at the Downing College (The Grace Howard Room)

Friday, 28.11.2014

Antenatal determinants of NEC

Christoph Lees, Cambridge, U.K.

Radiologic diagnosis - evidence of plain X-ray

Anna Gomez, Addenbrooke's Hospital, Cambridge, U.K.

Radiologic diagnosis: the role of ultrasound

Oscar Navarro, Sick Kids Hospital, Toronto, CA.

Possible treatment of NEC with Stem Cells

Simon Eaton, UCL Centre for Stem Cells & Regenerative Medicine, London, U.K.

Surgical management of NEC: current controversies and pitfalls - European vs. US. View

David Hackam, Children's Hospital of Pittsburgh, U.S.

Paolo de Coppi, Great Ormond Street Hospital, London, U.K.

Nutritional management of the infant with NEC

Shazia Hoodbhoy, Addenbrooke's Hospital, Cambridge, U.K.

Vascular access: pitfalls

James Bennett, Birmingham Children's Hospital, Birmingham, U.K.

Consensus of current Guidelines – round table discussion

Management and Case discussions

Intestinal failure: A gastroenterologist's perspective

Jonathan Hind, King's College Hospital, London, U.K.

Bowl Transplantation: indication, management, complications

Khalid Sharif, Birmingham Children's Hospital, Birmingham, U.K.

Poster Session

This year a poster session will be included in the PESPOS program.

We will select a limited number of posters for a 5 minute presentation and discussion session.

Thereafter our expert panel will choose the best poster will be honored.

Posters are invited to reflect on current management, challenges and new innovations in neonates with necrotizing enterocolitis. These may be from any aspect of this disease as well a new innovative treatment strategies and case reports. Abstracts should be around **500 words** and should be accompanied by the completed application form.

Abstract (<500 words) and keywords.

Submission deadline 19th October 2014

Please, download >>> the form and email to atif@pespos.org.

Registration

Please, download registration form online (www.pespos.org) submit via email (Pat.Bennink@medschl.cam.ac.uk) or post.

Congress Language

English, no simultaneous translation
