## 11° COURSE ON PEDIATRIC UROLOGY

*“Bambino Gesù” Children’s Hospital  
Rome, 16th -17th September, 2016*

## NOTES

*Dear Colleagues and Friends,*

*It is really a great pleasure to invite all of You once again to participate to the Course on Pediatric Urology “How we do it and How we did it”. The Course, at the 11th annual edition, maintains the practical characterization with live surgical demonstrations, video-presentations of surgical techniques and wide interactive discussion between Experts and Participants.*

*In the 2016 year edition, we will have the chance to observe and discuss videos on old urological reconstructive techniques, that someone probably has never seen but that can be still considered corner-stones on Pediatric Urology (gastro-cystoplasty, bowel reservoirs, ancient hypospadias repairs, bladder neck reconstruction, ...). It will be a special session, to better understand the evolving steps in Pediatric Urology.*

*Do not miss this Course! As the number of participants is limited to 60 people to better enjoy interactive discussion, please complete your registration on time.*

*See you soon in Rome, the Eternal City with the special atmosphere of in the Jubileum year!*

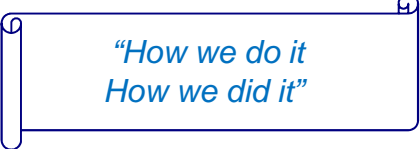

*Paolo Caione*

*Nicola Capozza*

NOTES

11° CORSO DI UROLOGIA PEDIATRICA

*“How we do it  
How we did it”*

*Ospedale Pediatrico “Bambino Gesù”  
Roma, 16-17 Settembre 2016*

*Cari Amici e Colleghi,*

*Sono lieto di invitarVi ancora una volta a partecipare al Corso di Urologia Pediatrica “How we do it and How we did it”. Il Corso, giunto alla sua 11° edizione, mantiene la caratteristica di essere un corso pratico, con dimostrazioni chirurgiche in diretta dalle Sale Operatorie, presentazioni video di tecniche particolari e ampie discussioni interattive tra Esperti e Partecipanti.*

*Novità di questa edizione, avremo occasione di vedere e discutere antiche tecniche urologiche ricostruttive, oggi desuete ma che hanno rappresentato “pietre miliari” in Urologia Pediatrica, come la gastrocistoplastica, l’Indiana Pouch o altri reservoir urinari intestinali, tecniche oggi abbandonate di riparazione di ipospadia ed epispadia, etc. Conoscere il passato, con tecniche forse oggi mai viste da molti giovani Colleghi, permette di comprendere meglio le prossime tappe evolutive della nostra specialità.*

*Non perdetevi questa opportunità! Il numero di partecipanti è limitato a 60, per ottenere migliori discussioni interattive: pertanto non dimenticate di iscriverVi per tempo, usufruendo della quota ridotta. Ci incontriamo quindi in questa occasione, a Roma, che ci accoglie con la sua speciale atmosfera dell’Anno del Giubileo.*

*Paolo Caione e Nicola Capozza*

*Direttori del Corso*

## **Preliminary Programme**

## **NOTES**
